

KAF ENHANCED BOND FUND (KEBF)

OCTOBER 2025

The fund aims to maximise total returns by investing primarily in money market securities and other fixed income securities which provide current income, capital appreciation or a combination of both income and capital appreciation.

THE FUND IS SUITABLE FOR INVESTORS WHO:

- Require a regular income distribution;
- Want a professionally-managed portfolio of fixed-income securities and money market securities;
- Have a medium-term investment horizon of one (1) to three (3) years or more.

MANAGER'S COMMENTS

Malaysia's exports grew by 1.9% while imports declined by -5.9% Year-on-Year (YoY) in August 2025 (August). The trade surplus increased to Malaysian Ringgit (MYR) 16.1 billion (bn) in August; up from MYR15.0bn in the previous month (July). Malaysia's Consumer Price Index (CPI) was higher at 1.30% YoY in August compared to 1.20% in July 2025 (July). Malaysian foreign reserves increased in September 2025 (September) to United States Dollar (USD) 122.8bn from USD122.0bn in August. Meanwhile, Malaysia's Purchasing Managers' Index (PMI) was lower at 49.8 in September compared to 49.9 in the previous month. US Treasury yields were mixed in September with the Treasury 2-year, 5-year and 10-year benchmark yield closing the month at 3.61%, 3.74%, and 4.15% respectively compared to 3.62%, 3.70%, and 4.23% in August. Malaysian Government Securities (MGS) 3-year, 5-year yield and 10-year yield was higher, ending at 3.10%, 3.22% and 3.45% in September compared to 3.00%, 3.08% and 3.39% in the previous month.

Global Fixed Income markets sprang to life in September during the run up to the Federal Open Market Committee (FOMC) meeting in the middle of the month as buyers came out with certainty that the US Federal Reserve (the Fed) was going to cut rates. The Fed did cut the Fed Funds Rates (FFR) by 25 basis points (bp) but instead of a strong follow-through rally, bond prices fell off as investors viewed that the market had gotten ahead of itself. Despite more clarity over US President Trump's trade policies, forward guidance from the Fed continues to be murky as it grapples with a softening US labour market and stubbornly high tariff-fueled US inflation. Market participants are expecting another 2 rate cuts in 2025 which will bring the FFR down to 3.75% and an eventual neutral rate of 3.25% by end of 2026. Back in Malaysia, the local bond market soured as investors took profits on their bond holdings after an uptick in local Consumer Price Index (CPI) inflation and the announcement of subsidised Research Octane Number (RON) 95 at Ringgit Malaysia (RM) 1.99 per litre down from the previous RM2.05 for all Malaysians with valid driving licenses including the (top 15 percent) T15 income bracket. Investors were also flushed with bonds after a flurry of corporate bond issuances on top of weekly government bond auctions. The 4 government auctions in September totaling RM16.5bn saw only moderate demand with the 3-year MGS 04/2028, 30-year Government Investment Issue (GII) 03/2054, 15-year MGS 04/2039 and 3-year GII 07/2028 minting Bid-to-Cover (BTC) ratios of 1.928x, 1.928x, 1.52x and 2.876x respectively. As bond yields are higher now, we are looking for opportunities to buy quality assets at attractive prices while maintaining our conservative stance of low to medium portfolio duration and an emphasis on high credit quality.

INVESTMENT STRATEGY

The strategic limit on asset allocation of the fund is as follows:

- Fixed-income securities and liquid assets: Minimum 90% and maximum 100%.
- Equities and equity-related securities: Minimum 0% and maximum 10%

Disclaimer:

Based on the Malaysian Fund Volatility Report issued by Refinitiv Lipper dated 14 October 2025, the Volatility Factor (VF) for this fund is 1.76 and is classified as "Very Low". "Very Low" includes funds with VF that are between 0 and 4.33. The VF means there is a possibility for the fund in generating an upside return or downside return around this VF. The Volatility Class (VC) is assigned by Lipper based on quintile ranks of VF for qualified funds. VF is subject to monthly revision and VC will be revised every six months. The fund's portfolio may have changed since this date and there is no guarantee that the fund will continue to have the same VF or VC in the future. Presently, only funds launched in the market for at least 36 months will display the VF and its VC.

A Product Highlights Sheet ("PHS") highlighting the key features and risks of the fund is available and investors have the right to request for a PHS. Investors are advised to obtain, read and understand the PHS and the contents of the Replacement Master Prospectus dated 30 September 2023 and its supplementary(ies) (if any) ("the Master Prospectus") before investing. The Master Prospectus has been registered with the Securities Commission Malaysia who takes no responsibility for its contents. Amongst others, investors should consider the fees and charges involved. Investors should also note that the price of units and distributions payable, if any, may go down as well as up. Where a unit split/distribution is declared, investors are advised that following the issue of additional units/distribution, the NAV per unit will be reduced from pre-unit split NAV/cum-distribution NAV to post-unit split NAV/ex-distribution NAV; and where a unit split is declared, investors should be highlighted of the fact that the value of their investment in Malaysian Ringgit will remain unchanged after the distribution of the additional units. Any issue of units to which the Master Prospectus relates will only be made on receipt of a form of application referred to in the Master Prospectus. For more details, please call 03-9767 6000 for a copy of the PHS and the Master Prospectus or collect one from any of our authorised distributors.

The Manager wishes to highlight the specific risks of the fund are specific stock risk, interest rate risk, equity-related securities risk and credit/default risk. These risks and other general risks are elaborated in the Master Prospectus.
