KAF Investment Funds Berhad Partners with Cashku to Offer Selected Funds on Its Digital Wealth Platform

Kuala Lumpur, 30 October 2026 – KAF Investment Funds Berhad ("KIFB") has signed a distribution agreement with Cashku, a Malaysian AI-native digital wealth platform, under which a selected range of KAF's funds will be made available on the platform.

KAF Investment Funds Berhad holds a Capital Markets Services Licence under the Capital Markets and Services Act 2007 and is majority owned by KAF Investment Bank Berhad.

As at 30 September 2026, KIFB offers 17 conventional and Islamic collective investment schemes catering to diverse investment objectives and risk profiles. Its products are distributed through its in-house sales team, Institutional Unit Trust Advisers (IUTAs), and registered agents, providing investors with accessible investment solutions and personalised services.

The SC's Capital Market Masterplan 2026–2030 expects digital platforms and AI-enabled advisory services to lower costs, broaden participation and provide tailored solutions. With this agreement, Cashku's service now covers the KAF range. KAF has been recognised at the LSEG Lipper Fund Awards Malaysia in each of the last three years.

The KAF range spans money market and sukuk strategies, balanced, growth and income funds, as well as domestic and global equity funds. It includes both conventional and Shariah-compliant mandates, and each fund carries its own risk classification set by KAF as the manager.

Cashku has also announced that it is adding funds available under the Employees Provident Fund's Members Investment Scheme, giving eligible EPF members a wider choice. Its planning engine can apply an investor's Shariah preference across the whole plan. This is significant in Malaysia, where Islamic products make up 64 percent of the MYR4.3 trillion capital market, according to the SC.

Investors can complete a risk profiling assessment before investing. Cashku's AI tools can help licensed financial advisers prepare recommended portfolios, and each recommendation is reviewed and provided by a licensed adviser.

Mohammad Fariz bin Ahmad Shamsuddin, CEO of KAF Investment Funds Berhad, said: "Partnering with a licensed digital platform makes KAF's funds accessible to a broader range of investors."
