PRODUCT HIGHLIGHTS SHEET

KAF FIRST FUND

Name of Fund	KAF First Fund.
Fund Category	Balanced.
Fund Type	Income and growth.
Commencement Date	16 January 1996.
Capital Protected / Guaranteed	No.

PRODUCT SUITABILITY

WHO IS THE PRODUCT SUITABLE FOR?

This Fund is suitable for investors who:

- want a professionally managed portfolio of equity and fixed-income securities;
- have a medium to long-term investment horizon of three (3) to five (5) years or more; and
- want to achieve an adequate level of regular income and capital gain at an acceptable level of risk.

KEY PRODUCT FEATURES

WHAT ARE YOU INVESTING IN?

The Fund's investment objective is to provide medium to long-term investors with a reasonable level of income and capital growth.

Investment Strategy

Investment policy and strategy

Asset allocation:

The strategic limit on asset allocation of the Fund is as follows:

Equities	Minimum 40% and maximum 60%
Fixed-income securities and liquid assets	Minimum 40% and maximum 60%

The process begins with a top-down view for asset allocation decisions and a bottom-up view for stock selection.

The asset allocation strategy is dependent on the state of the macro picture as perceived by the Manager after going through a strict investment process to review the outlook of the economy, stock and money markets over the medium to long-term horizon. This entails relevant analysis on economy and business statistics in order to produce forecasts for stock market and interest rates directions. The Manager adopts an active asset allocation policy and will time the investment strategies to suit market developments and global economic conditions. Where necessary, the Manager will switch the asset allocation appropriately between equities, bonds and money market instruments.

The above asset allocation policy of the Fund may be reviewed from time to time based on the general market and economic situations.

The Manager may take temporary defensive positions that may be inconsistent with the Fund's principal strategy in attempting to respond to adverse market conditions, economic or political market conditions. This defensive position may take the form of holding significantly higher amount of liquid assets/cash and/or money market instruments. The Manager will then decide on the best appropriate asset allocation strategy and reallocate the Fund's equity investment into other more defensive investments. The weighting for equity investments then may be scaled down to not less than 20% of the Fund's NAV.

For **equity securities**, the Manager adopts a bottom-up approach in selecting equities after having ascertained the direction of the economy. Portfolio construction will focus on the category of stocks, which will benefit most from the Manager's view of the market. In order to enhance returns to the Fund, the Manager will conduct fundamental analysis on potential investable companies to determine the suitability of the investment. Information can be obtained from regular company visits and participation in various industry presentations and stockbrokers forums. Apart from stocks picks, the Manager will also actively monitor industry trends, earnings revision trends and financial performances of companies which the Fund has interest in, so that appropriate investment decisions can be made.

Accordingly, some of the important investment criteria for stocks selections are as follows:

- High earnings per share growth potential;
- Low price earnings to growth ratio;
- Strong balance sheets;
- Cash flows and gearing levels;
- Relatively high dividend yield;
- Focused management team and its track records; and
- Sustainable financial performance.

The Manager will only make an investment in collective investment schemes if those investment objectives complement the objective of the Fund and enhance the Fund's return.

To mitigate risks, the Manager may also invest (when necessary) in futures contracts and options to hedge against market volatility and protect the Fund's value. Futures contract will only be used to hedge against the Fund's equity exposure from any unexpected price movements in the underlying market.

For **fixed-income securities**, the Fund will at all times place/invest its non-equity investments in money market deposits, Malaysian Government Securities ("MGS") and a diversified portfolio of corporate bonds (listed or unlisted) rated at least "BBB" by RAM or other approved rating agencies. The fundamental investment process for the fixed-income investments is mainly driven by the interest rate outlook over the medium to long-term horizon. The Manager will from time to time, review the economic and interest rates outlook to determine the appropriate duration for the bond investments. Regular reviews on credit ratings of bond investments are conducted to seek for potential upgrades and avoid potential downgrades of bond investments to achieve better returns for the Fund.

Accordingly, some of the important investment criteria or principal valuations measures for selections of fixed-income securities are as follows:

- Issuer's financial position and gearing levels;
- Issuer's cash flow quality;
- Issue's expected future cash flow and repayment ability;
- Industry outlook;
- Duration and interest rates sensitivity analysis;
- Yield to maturity;
- Yield to first call;
- Ratings by RAM/MARC; and
- Other applicable measures as and when necessary.

The Manager may from time to time decide on hedging the bond investments against interest rate movements using interest rates swaps. Hedging with interest rates swap would be effective in an aggressive interest rate hikes environment.

For the purposes of the Fund's investment in derivatives, the global exposure will be calculated using commitment approach to ensure it does not exceed the Fund's NAV. The global exposure of the Fund to derivatives is calculated as the sum of the:

- absolute value of the exposure of each individual derivative not involved in netting or hedging arrangements;
- absolute value of the net exposure of each individual derivative after netting or hedging arrangement; and
- the values of cash collateral received pursuant to the reduction of exposure to counterparties of over-the-counter (OTC) derivatives.

Benchmark

The composite benchmark comprising:

KEY RISKS

WHAT ARE THE KEY RISKS OF THIS INVESTMENT?

Specific risk of the Fund

- **Specific stock risk**

Specific stock risk can be associated with the shift in consumer taste, advertising campaigns, lawsuits and competitive industry conditions. It can be mitigated by diversifying the Fund's investment over more companies in various segments of the economy, which operate independently from one another. Failing to achieve the expected earnings would result in the stock price declining, which in turn will affect the performance of the Fund. Specific stock risk is mitigated by exercising prudence in stock selection.

- **Interest rate risk**

Interest rate risk is crucial in a bond/sukuk portfolio management as it depends on forecasting interest rate movements. Prices of bond/valuation of sukuk move inversely with interest rates and the degree of sensitivity to interest rates is a function of bond/sukuk maturity and coupon/profit payment as well as the level of interest rates. In the event of rising interest rates, prices of bond/valuation of sukuk will decrease and vice versa. Corporate profits may be affected by high interest rates, hence affecting the NAV of the Fund. Therefore, interest rate risk should be low for short-term bonds/sukuk, moderate for intermediate term bonds/sukuk and high for long-term bonds/sukuk. Interest rate risk is mitigated by exercising prudence in the selection of investments, strict monitoring of those investments and ensuring sufficient diversification of the Fund's investments.

- **Credit/default risk**

Credit risk refers to the possibility that the issuer of a bond/sukuk will not be able to make timely payments of interest/profit on the coupon/profit payment date or principal repayment/payment on the maturity date. The risk is graded by credit rating agencies that rate the issuer's ability to meet these obligations in a timely manner. Failure to comply with conditions attached to the issue or to make a repayment or a payment on time will result in an event of default. A default by the issuer will result in a fall in the value of bonds/sukuk which ultimately reduced the NAV of the Fund. The lower the rating, the greater the risk that the bond/sukuk issuer will default. All things being equal, the lower a bond's/sukuk's credit rating, the higher its yield should be to compensate investors for assuming higher risk. Mitigating credit risk involves diversification of the Fund's investments.

Please be advised that if a Unit Holder invests in units through an IUTA which adopts the nominee system of ownership, the Unit Holder would not be considered to be a Unit Holder under the deed and the Unit Holder may consequently not have all the rights ordinarily exercisable by a Unit Holder (for example, the right to call for a Unit Holder's meeting and to vote thereat and the right to have the Unit Holder's particulars appearing in the register of Unit Holders of the Fund).

Performance review:

For the latest financial year, the Fund recorded a negative return of 10.39%, underperforming its benchmark which recorded a return of 2.46%. It is due to the Fund's overweighting of energy and technology stocks, which underperformed the broader market during the year.

The Fund maintained a high equity exposure for most of the period, with stock selection made up of a combination of value and growth stocks.

Since inception, the Fund recorded a total return of 276.69% compared to its benchmark, which recorded a return of 121.64%.

Distribution record:

	Financial year ended 31 December		
	2025	2024	2023
PTR	0.26 times	0.41 times	0.49 times

The PTR for the latest financial year was lower than the previous financial year due to the decrease in the portfolio rebalancing activities undertaken by the Fund.

VALUATIONS AND EXITING FROM INVESTMENT**HOW OFTEN ARE VALUATIONS AVAILABLE?**

The Fund will be valued at least once every Business Day. The valuation of the Fund will be conducted at the close of Bursa Malaysia for that Business Day.

From time to time, Unit Holders will be able to obtain the unit price of the Fund as published in the major newspaper and at our website, www.kaf.com.my to monitor their investments. Unit Holders may also obtain the latest NAV per unit by contacting the Manager directly.

HOW CAN YOU EXIT FROM THIS INVESTMENT AND WHAT ARE THE RISKS AND COSTS IN DOING SO?

Unit Holders may redeem their investments in the Fund by completing the prescribed repurchase request form and returning it to the Manager before the cut-off time of 4:00 p.m. on a Business Day. Any repurchase request received after 4:00 p.m. on a Business Day will be considered to be received on the next Business Day.

There are no restrictions on the number of units a Unit Holders can redeem out of his investments and no restrictions on the repurchase frequency.

If following a repurchase request leaves the Unit Holder with less than 500 units or such other lower quantity as the Manager may decide from time to time (minimum investment balance), the Manager has the option to liquidate the balance of the units held in the Unit Holder's account and forward the proceeds to the Unit Holder.

Repurchase proceeds will be paid within seven (7) Business Days from the date on which the repurchase request is received by the Manager.
