

KAF MILLENNIUM FUND (KMF)

FEBRUARY 2026

The Fund aims to achieve long-term capital growth, with income as its secondary objective, by investing mainly in fundamentally sound large market capitalisation companies and also any other investments as may be permitted by the Securities Commission from time to time.

THE FUND IS SUITABLE FOR INVESTORS WHO:

- Are seeking capital growth and income from large companies;
- Are targeting companies exhibiting fundamental strength with market capitalisation; and
- Seek diversification into different industries.

MANAGER'S COMMENTS

United States (US) equity markets ended January 2026 (January) higher, supported by improving market breadth and a rotation away from mega-cap concentration. The Dow Jones Industrial Average rose 1.73%, while the Standard & Poor (S&P) 500 and Nasdaq gained 1.37% and 0.95%, respectively. Sentiment remained resilient on steady economic conditions and sustained demand for AI-related technologies, despite heightened political and geopolitical uncertainty. European equities also advanced, with the STOXX Europe 600 climbing 3.18% amid easing inflation pressures and expectations of a less restrictive monetary policy stance. In Asia, Japan's Nikkei 225 rose 5.93%, supported by a weaker yen, continued foreign inflows and optimism over pro-growth policies. Greater China markets delivered solid gains, with the Hang Seng Index up 6.85%, while the Shanghai Composite and Shenzhen Composite rose 3.76% and 6.04%, respectively, supported by improved liquidity conditions and selective bargain hunting. On the domestic front, Malaysian equities recorded a strong start to 2026, with the Financial Times Stock Exchange Bursa Malaysia Kuala Lumpur Composite Index (FBMVKLI) rising 3.62% to close at 1,740.88 points, its strongest month-end level in several years. Market participation improved markedly, with average daily trading volume increasing 42.31% month-on-month. The FBM EMAS and FBM EMAS Shariah indices gained 3.60% and 1.48%, respectively, while the FBM Small Cap Shariah Index rose a more modest 0.78%, indicating selective risk-taking beyond large-cap names. In commodities, crude oil prices surged 16.17% to US Dollar (USD) 70.69 per barrel on elevated geopolitical risks and tighter supply expectations. Gold prices rose 8.59% on safe-haven demand, while crude palm oil prices gained 4.42%, supported by seasonal supply tightness and biodiesel-related demand expectations in Indonesia. Meanwhile, the Malaysian ringgit appreciated 2.83% against the US dollar to RM3.9453 at end-January.

Recent market developments point to a much more supportive backdrop for Emerging Markets (EM). Even as geopolitical noise resurfaced, from the military intervention in Venezuela to renewed tensions in Iran and ongoing Russia-Ukraine talks, investors are largely looking past the headlines. The focus has shifted to the real story: a stabilizing global macro environment and a massive structural pivot in the Artificial Intelligence (AI) investment cycle. As AI demand moves from training large models to localized inference and compute, the US is hitting major bottlenecks in power grid capacity, labour, and infrastructure delivery. This is naturally pushing capital toward Asia and other Emerging Markets where these constraints are fewer, allowing them to capture a larger slice of the global tech boom. With China's data finally showing stabilization rather than a further dip, and regional currencies holding firm, we remain bullish. We are seeing a clear broadening of capital flows beyond overcrowded developed markets, creating a very constructive environment for EM equities as risk appetite normalizes.

INVESTMENT STRATEGY

- The fund may invest up to 100% (minimum equity allocation is 70%) of its NAV in equities and equity-related securities
- The balance of the NAV that is not invested in equities and equity-related securities, will be invested in fixed income securities and money market instruments

Disclaimer:

Based on the Malaysian Fund Volatility Report issued by Refinitiv Lipper dated 10 February 2026, the Volatility Factor (VF) for this fund is 10.69 and is classified as "High". "High" includes funds with VF that are between 10.235 and 13.595. The VF means there is a possibility for the fund in generating an upside return or downside return around this VF. The Volatility Class (VC) is assigned by Lipper based on quintile ranks of VF for qualified funds. VF is subject to monthly revision and VC will be revised every six months. The fund's portfolio may have changed since this date and there is no guarantee that the fund will continue to have the same VF or VC in the future. Presently, only funds launched in the market for at least 36 months will display the VF and its VC.

A Product Highlights Sheet ("PHS") highlighting the key features and risks of the fund is available and investors have the right to request for a PHS. Investors are advised to obtain, read and understand the PHS and the contents of the Replacement Prospectus dated 21 December 2022 and its supplementary(ies) (if any) ("the Replacement Prospectus") before investing. The Replacement Prospectus has been registered with the Securities Commission Malaysia who takes no responsibility for its contents. Amongst others, investors should consider the fees and charges involved. Investors should also note that the price of units and distributions payable, if any, may go down as well as up. Where a unit split/distribution is declared, investors are advised that following the issue of additional units/distribution, the NAV per unit will be reduced from pre-unit split NAV/cum-distribution NAV to post-unit split NAV/ex-distribution NAV; and where a unit split is declared, investors should be highlighted of the fact that the value of their investment in Malaysian Ringgit will remain unchanged after the distribution of the additional units. Any issue of units to which the Replacement Prospectus relates will only be made on receipt of a form of application referred to in the Replacement Prospectus. For more details, please call 03-9767 6000 for a copy of the PHS and the Replacement Prospectus or collect one from any of our authorised distributors.

The Manager wishes to highlight the specific risks of the fund are company specific risk, warrants investment risk, country risk and currency risk. These risks and other general risks are elaborated in the Replacement Prospectus.
